# CHECK MODE PROCEDURE

05IXB–01

Hand–held Tester

A82795

**1. CHECK MODE (SIGNAL CHECK)**

(a) Connect the hand–held tester to the DLC3.

(b) Turn the power switch on (IG).

(c) Select the "SIGNAL CHECK", and proceed checking with the hand–held tester.

HINT:

- Malfunctions can be detected in the check mode better than the normal check mode.

- If the normal system code is output in the normal check mode even when a sensor signal malfunction is suspected, perform the inspection in the check mode.
