## SFI SYSTEM

## PRECAUTION

NOTICE:

- Perform RESET MEMORY (AT initialization) when replacing the automatic transmission assembly, engine assembly or ECM (see page AX-18).
- Perform REGISTRATION (VIN registration) when replacing the ECM (see page ES-13).
HINT:
Initialization cannot be completed by only removing the battery.

## DEFINITION OF TERMS

| Terms |  |
| :--- | :--- |
| Monitor Description | Description of what ECM monitors and how detects malfunctions (monitoring purpose and <br> details). |
| Related DTCs | Group of diagnostic trouble codes that are output by ECM based on same malfunction <br> detection logic. |
| Typical Enabling Condition | Preconditions that allow ECM to detect malfunctions. <br> With all preconditions satisfied, ECM sets DTC when monitored value(s) exceeds <br> malfunction threshold(s). |
| Sequence of Operation | Order of monitor priority, applied if multiple sensors and components involved in single <br> malfunction detection process. <br> Each sensor and component monitored in turn, when previous detection operation <br> completed. |
| Required Sensor/Components | Sensors and components used by ECM to detect each malfunction. |
| Frequency of Operation | Number of times ECM checks for each malfunction during each driving cycle. <br> "Once per driving cycle" means ECM only performs checks for that malfunction once <br> during single driving cycle. <br> "Continuous" means ECM performs checks for that malfunction whenever enabling <br> conditions met. |
| Duration | Minimum time for which ECM must detect continuous deviation in monitored value(s) in <br> order to set DTC. Timing begins when Typical Enabling Conditions met. |
| Malfunction Thresholds | Value, beyond which, ECM determines malfunctions exist and sets DTCs. |
| MIL Operation | Timing of MIL illumination after malfunction detected. <br> "Immediate" means ECM illuminates MIL as soon as malfunction detected. <br> "2 driving cycle" means ECM illuminates MIL if same malfunction detected second time <br> during next sequential driving cycle. |
